Robotics reaches out to community

BY JENNIFER TSAU

On a campus with few inter-school events, the Leland Robotics Team 604 is branching out in hopes of establishing stronger community relations.

This past Sunday, Team 604 held a presentation for Presentation High School in club advisor **Helen Arrington's**, Mathematics Dept., room E-1. The display consisted of an explanation of the inner workings of the team, a description of how to get ready in competitions, a mechanical overview of last season's robot and a demonstra-

tion of changing the wheels on the robot. The team even took their "baby" out for a test-drive to show it in action.

Leading Presentation High School's team was Dr. John Howe, director of Presentation's mathematics and science academy, who has hopes of establishing a strong Robotics team on his own campus. Thus, he has asked Leland's team to mentor and help develop their team.

"Our team is very excited about working with the Presentation team," said Robotics Team President, Junior **Amy Qian**.
